skills

Feature project

Broccoli

React Js single page application for consuming **recipe API**. Platform allows users to create account and save favourite recipes using **Firebase**.
(live version on GitHub)

A healthy mix of technical and design skills helps me approach each new challenge with excitement. Skills acquired during my architectural career directly translate into frontend i.e organising complex projects and forming ideas into reality.

I'm looking for full-time front-end developer position.

about me

03/2017 - 10/2021

Bryden Wood Technology (London) - Architectural Assistant

I have been given the opportunity to work in multiple teams delivering for GlaxoSmithKline, Vastin, Johnson Matthey, Laing O'Rourke. Working on all stage, from concept to detail design, I was also:

- A member of **technical team providing guidance** to facilitate the work of other teams.
- Researching and implementing work-flows for CGI and Building Information Modelling that drastically speed up the delivery process in the company.

experience

01/2021 - Now

Project Odin Bootcamp "Foundation" and "Full Stack JavaScript"
Udemy "Advanced CSS and Sass: Flexbox, Grid, Animations and More!"

2011 - 07/2017

Poznan University of Technology (M.Sc.) Field of study : Architecture ,including:

- Erasmus - University degli studi di Firenze
- Research Laboratory of Digitally Design Architecture
