

# Adam Mrotek

Software Developer

## about

Looking for Full Stack Developer positions, interested in Architecture, E-Commerce and FinTech companies. Currently Full Stack Engineer at Hullabalook. I'm eligible to work in the United Kingdom.

## experience

### **Hullabalook, London - Software Developer** April 2022 – Now

Hullabalook is a SaaS and B2B company specializing in enchanting retail experience inside furniture and electronics e-commerce. Key career points and responsibilities:

- Delivering features and visual updates on existing/commercial code base on CI/CD pipeline basis
- De-risking and prototyping apps inside Vue/Vuex/Nuxt frameworks and Fabric.js/canvas
- Curating retailers data and investigating programmatic solution to unordered and incomplete data feeds
- Improving Lighthouse code performance

## highlight personal project

### **Broccoli – React/Firebase** [Link](#)

Single-page application for recipe API. The platform allows search and save favorite recipes and generates a grocery list. Application takes advantage of custom hooks and functional components

## education

Project Odin Bootcamp, remote – "Foundation" and "Full Stack JavaScript."

Udemy, remote – "Advanced CSS and Sass: Flexbox, Grid, Animations and More!"

## skills

### **React / Vue / Vuex / Nuxt**

Building SPA using functional components and Hooks(including custom hooks and context API).

### **JavaScript / TypeScript**

Solid understanding of OOP principles, array methods and ES6+ features.

### **CSS/Sass**

Building custom components and following BEM strategy

### **Firebase, NodeJS, ExpressJS, Requestly**

Building backend API with authentication and noSQL database
