TypeScript | React | Vue | Node | Python | FastAPI | PostgreSQL | AWS | REST | Docker | CI/CD

SUMMARY

Full-stack engineer with 4+ years' commercial experience shipping complex user platforms and AI tools, Vue/React and TypeScript in production - from design systems to Python / FastAPI APIs.

Currently building a production AI system - www.villageos.co.uk.

WORK EXPERIENCE

Front-end Engineer (Full-Stack Delivery), Croud

Jul 2023 - Mar 2026 (2y 9m)

Marketing Agency

TypeScript, FastAPI, Django REST, React, Vue, shadcn/ui, Tailwind CSS, GraphQL, Docker, Claude / MCP

- **Social Influencer Platform:** Early engineer on an in-house influencer-marketing platform - an internal build that replaced a £17M third-party agency quote. Built user profiles, dashboards and registration-of-interest flows - extending and integrating FastAPI backend. Set up a Figma-to-code pipeline and AI engineering standards.
- **Core Platform (Croud Control, 3,000+ users):** Co-architected the TypeScript component design system for a marketing-automation suite and authored APIs when backend bandwidth was short.
- **Internal AI tools:** Owned roadmap, scoping and prioritisation for interfaces of agency AI tools featured in client decks - working closely with design and system engineers.

Customer Engineer, Hullabalook

Apr 2022 - Jul 2023 (1y 4m)

Improving retail experience using data analytics · Retail · B2B · SaaS · eCommerce

React, Vue.js, Vuex, Nuxt, TypeScript, Fabric.js, Python, GCP

- Drove successful client upsells by prototyping new features in React, and improved Lighthouse / SEO scores
- Improved data accuracy by building solutions for unstructured, incomplete datasets using Python.
- Mentored junior engineers through code reviews and pairing sessions, helping raise code quality and shorten onboarding.

Architectural Assistant (Part I & II), Bryden Wood

Mar 2018 - Sep 2021 (3y 6m)

Multidisciplinary architectural company · Property · Design · Construction

- Designed and contributed to technical delivery of the projects for airports and data centres, applying platform-based, systems-thinking design principles and driving coordination across architectural and M&E teams.

PRODUCTION AI SYSTEMS & R&D

VillageOS · Full-Stack Engineer

Apr 2026 - Present

Solo-built AI product · live in production · villageos.co.uk

Next.js, React, TypeScript, TanStack Query, shadcn/ui, FastAPI, AWS Lambda, Supabase, OpenAI, Groq, PostHog

Designed, built and shipped VillageOS - AI product that turns scattered parent communication (WhatsApp threads, PDF newsletters, photos of flyers) into calendar events. Owned every architectural decision (23 points ADR so far) : frontend, backend, data, infrastructure, CI/CD and LLM evaluations.

EDUCATION

Anthropic Academy

May 2026

Certificate of completion - Claude with Amazon Bedrock

- Building production-ready AI applications with Claude on Amazon Bedrock - the Bedrock API, prompt engineering and evaluations, tool use, retrieval-augmented generation (RAG), the Model Context Protocol (MCP), and agents.

MSc & BArch, Architecture

2011 - 2017

Politechnika Poznańska (Poznan University of Technology) · incl. Erasmus, Università di Firenze

ADDITIONAL

Languages: English (Full Professional), Polish (Native / Bilingual)

Interests: Architecture, Tech for good / Green tech, Feng-shui, Cooking.
